OUR SERVICES

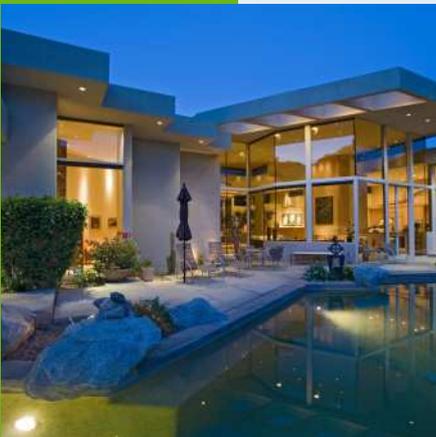

MOVING WALKS

Moving walks, also known as moving sidewalks or travelators, are a type of horizontal conveyor system that transport people over short to medium distances. They are similar to escalators, but instead of a vertical set of steps, they consist of a flat conveyor belt that moves people along a horizontal or inclined path.

PARKING SYSTEMS

Parking systems refer to the various methods and technologies used to manage and organize parking in both public and private areas. These systems can range from simple parking meters and pay-and-display machines to complex automated systems that use sensors, cameras, and software to optimize parking spaces and improve the PAND user experience.

HOMELIFTS

Homelifts, also known as residential lifts or home elevators, are vertical transportation systems designed to provide access between different floors of a home.

INDUSTRIAL LIFTS (EXPLOSION PROOF)

Explosion-proof industrial lifts, also known as hazardous location lifts, are specialized lifting systems designed for use in areas where there is a risk of explosion due to the presence of flammable gases, vapors, or dust. These areas are commonly found in industries such as oil and gas, chemical processing, pharmaceuticals, and food processing.

Global City

OUR SERVICES

INCLINED ELEVATORS

Inclined elevators are a type of vertical transportation system that is designed to travel at an inclined angle rather than straight up and down like traditional elevators. They are commonly used in situations where there is limited space or where a steep incline needs to be traversed, such as on a hillside or in a multi-story building with a sloping roofline.

MARINE ELEVATORS

Marine elevators, also referred to as ship elevators, are advanced vertical transportation systems specifically engineered for maritime environments. Designed for seamless integration within ships and vessels, these elevators ensure effortless movement between different decks, providing both passengers and crew with safe, efficient, and comfortable access throughout the vessel.

Tailored to withstand the unique challenges of the marine setting, they enhance onboard convenience and operational efficiency.

DUMB WAITER

Dumbwaiters are small freight elevators that are designed to transport goods or materials between different levels of a building. They are typically used in commercial settings such as restaurants, hotels, and hospitals, where there is a need to move goods quickly and efficiently between different floors or areas.

THIRD PARTY MAINTENANCE AND TROUBLESHOOTING

At Global City Elevators, we specialize in third-party maintenance and troubleshooting, ensuring elevators of all makes and models operate at peak performance. With our expert technical team and 30+ years of industry experience, we provide swift, reliable solutions that minimize downtime and extend equipment lifespan. Trust us to keep your elevators running smoothly, efficiently, and safely, regardless of the brand or complexity.

OUR SERVICES

COMPLETE ELEVATORS & ESCALATOR PACKAGES

A complete elevator/escalator package service typically refers to a comprehensive package that includes everything needed to install, maintain, and repair elevators and escalators. The package may include design and consultation services, equipment selection and installation, ongoing maintenance and repair, and modernization and upgrades. even

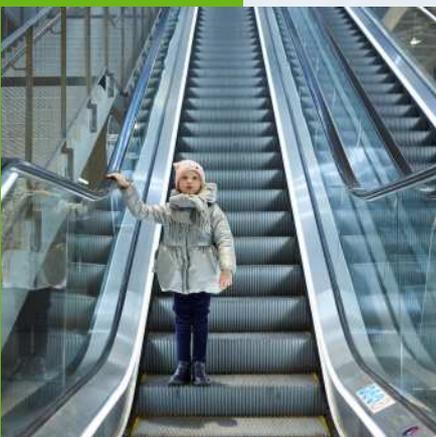

LIFT COMPONENTS

Lift components are the individual parts or elements that make up an elevator or lift system. They include both mechanical and electrical components, and are designed to work together to provide safe and reliable vertical transportation.

SRARE PARTS

Spare parts of elevators are the replacement components that are used to repair or maintain elevators when their original parts become worn out, damaged, or obsolete.

ESCALATORS

An escalator is a type of moving staircase that helps people move between different levels of a building. It consists of a set of flat steps that are connected and move in a continuous loop, powered by an electric motor. At, global, we ensure that offer your top-of-the-line escalator packages

COMPANY RESPONSIBILITY

At Global City Elevators, we believe that our responsibility extends beyond providing quality services to our clients. We are committed to conducting our business in an ethical, sustainable, and socially responsible manner.

Our policy is to add value during all stages of product development (analysis of needs and specifications, development of customized designs and builders, manufacturing according to accepted standards) throughout the products life cycle including testing, quality control, installation and maintenance.

Thank you for considering Global City Elevators for your elevator and escalator needs. We look forward to working with you and providing you with exceptional service.

THANK YOU

We are dedicated to providing prompt and reliable services to our clients, and we look forward to the opportunity to earn your trust and business.
